Fredrick,

Here is an update agenda based on your input. Here are some responses to your email bullets.

1. I'm fine with walking to the buildings. We can see what the group prefers.
2. We will break for lunch and get our own.
3. I'll be sure to talk about the timeline for the five-year review. In general, I'd like to hear your and Lockheed's concerns and incorporate any necessary changes by the first week of April. I would still need to send the document to EPA legal for review. Overall, my goal is to finalize the document by the end of April.
4. That's fine if you don't have anything in writing for our meeting. I imagine the conversation we have will help you write your comments. I'm not sure what you mean by DEQ offering something for the separate March 26 meeting, but I'm open to hearing what you have to say. I'm sure we will have more meetings and DEQ involvement as we proceed with the groundwater plan.
5. As far as the air monitoring component, EPA has determined that we should add a recommendation to the five-year review to complete the air sampling work that is currently being done under the UAO. That is currently mentioned in the draft document, but it is not listed specifically as a recommendation. That data will help determine if an air exposure pathways exists and if air monitoring is needed. I will elaborate more at the meeting.

I hope this has answered your questions. Please let me know if the agenda is good to finalize and if all the participants are listed correctly.

Thanks,
Emy

Hi Emy,

Your agenda looks good. Here's some input for you:

1. For the contact for the site visit, you can list me or Howard Anderson with Northwest Aluminum who would answer any gates for us. From the Tenneson office we can either walk or take a vehicle to the fences without opening any gates. Let me know which you prefer.
2. Leaving the site to break the lunch would probably be the simplest option.
3. For your overview of the document, we will probably be interested in how and the timeline for Region 10 to finalize the 5-year report and per the 5-year guidance does Region 10 consider DEQ to be a supporting agency.
4. My goal of providing you something written probably won't happen. But for me, it will still be a good meeting in that I do have a lot of questions. During the Q&A I'll probably let Marcy go first with some groundwater questions. (Be thinking by Marcy's and others comments that even though DEQ is still not invited to the 3/26 meeting, and if Bernie is coming to the meeting with groundwater comments, whether DEQ could offer something by being there).
5. The only other topic I can think of is that Dennis said the report will have an air monitoring component later. If you can share any details of that would be good.

Cheers, Fredrick

Fredrick,

Here is a draft agenda based on your suggestions. I highlighted things that are uncertain. Let me know what edits you have for the agenda.

As far as a followup meeting, I have asked Bernie Z. to attend the meeting EPA is having with Lockheed on March 26 in Seattle. I am asking for his input on areas of interest for creating a more comprehensive groundwater monitoring network for the site. Creating a comprehensive groundwater monitoring program is one of the major recommendations from the five-year review. I imagine this is a topic we will discuss with DEQ, but I do not have a schedule for this effort yet.

-Emy

Thanks! Emy. I guess you and I should start to think about the agenda. Here's what I'm thinking and know, see what you think.

- Brian Thorne will not be there. His manager, Gene, will be the only one from Lockheed Martin. (BTW, Gene is bringing for me some DVDs with the information Lockheed submitted to Region 10 in October which previously is information DEQ was not aware of).
- DEQ might meet with Gene earlier in the morning only to talk about Lockheed's preliminary thoughts on the report. In that, if there is an issue DEQ has concerns but Lockheed doesn't, that would influence DEQ's perspective on forwarding the issue. But at this time Lockheed has not confirmed they will meet with us earlier.
- I have worked years along with Mike Slater, I am glad he is coming.
- I thought we would meet at 10:00, do introductions, then proceed with the perimeter visit (though I leave it to you on what you want to see). Then break for lunch (do we go our separate ways or have food brought in to the Tenneson building?)
- Then discuss the CERCLA 5-Year Report. I don't think DEQ will have the time to get together as a team and decide where we fall on the different items. But we will likely have a set of questions we could use clarification on. So I think our meeting will be somewhat informal for now. Because Bernie Z. will not be there, I wonder if there will be a groundwater follow-up meeting.
- Then we break at 3 pm.

See what you think, Fredrick

Fredrick,

I wanted to let you know that Dennis will not be able to attend the meeting on March 19. However, Mike Slater for the EPA Oregon office will be joining us for that meeting.

Thanks,
Emy
